GRANTS AND AWARDS (SELECTED LIST)

- 1. Illinois-Missouri Biotechnology Alliance (IMBA).** Research proposal titled “Assessing the Opportunities and Challenges of Soy Foods for Consumers, Markets and Public Policy.” Principal Investigators: Wanki Moon and Siva K. Balasubramanian. Results: publications in *British Food Journal* and *Journal of Food Distribution Research*.
- 2. Management Education Research Institute Grants Program,** Graduate Management Admission Council (GMAC). Research Proposal titled “The Value of Business School Attributes: An Empirical Investigation.” Result: a working paper.
- 3. National Collegiate Inventors & Innovators Alliance (NCIIA)** Funded seed grant for instructional/research proposal titled “Multi-Level Mentoring Initiative on Entrepreneurship,” PI: Siva K. Balasubramanian, CoPIs: Emily Carter, Terry Clark, and Kay Purcell. A partnership initiative (between the College of Business and the College of Engineering) that sought to educate students to become successful entrepreneurs. Each MBA student in the entrepreneurship concentration track will mentor a team of undergraduate engineering students enrolled in a two-semester course sequence in product design. For engineering students, the goal was to encourage them to move from prototypes to product launch with sensitivity to market challenges; for MBA students, the project provided opportunities to apply entrepreneurship principles in mentoring projects. We envisaged another layer of supervision for students: a successful entrepreneur served as a high-powered cheerleader/mentor for each student team.
- 4. Office of Research Development and Administration, SIUC** funded research grant. “Linking Marketing Efforts to Financial Performance,” (Siva K. Balasubramanian and Ike Mathur). Results: A publication in the *Journal of the Academy of Marketing Science* and two research manuscripts.
- 5. Illinois-Missouri Biotechnology Alliance (IMBA)** funded research grant. “Consumers’ Attitudes toward Labeling Genetically Modified Foods,” (Wanki Moon and Siva K. Balasubramanian). Awarded in September 2001. Results: Published a book chapter and five journal articles (in outlets such as *Journal of Consumer Affairs*, *British Food Journal*, *AgBio Forum*, *Review of Agricultural Economics*).
- 6. Illinois Council on Food and Agricultural Research (C-FAR)** funded research grant. “Assessing the Roles of Health Benefits in the Consumption of Soy Foods” (Wanki Moon and Siva K. Balasubramanian). Awarded in April 2001. Result: A publication in the *Journal of Agricultural and Resource Economics* and in the *Journal of Food Distribution Research*.
- 7. Verizon Inc.,** funded instructional/research grant. “E-Commerce Initiative for Southern Illinois: Instructional/Research Development Proposal for MBA Program Faculty.” (PI: Siva K. Balasubramanian). Results: integrated e-commerce content into the MBA curriculum.
- 8. GENCO Distribution Systems** funded research grant. Project Proposal (PIs: Siva K. Balasubramanian and Anand Kumar) titled “Reverse Logistics: Genesis.” Results: a conference presentation and a research manuscript.
- 9. International Council of Shopping Centers Educational Foundation** funded research grant. This project (PIs: Siva K. Balasubramanian and Ike Mathur) titled “Economic Concentration in the Shopping Center/Retail Industries: Past Patterns and Emerging Trends” won a national research proposal competition conducted by this Foundation. Result: a publication in the *Journal of Shopping Center Research*.
- 10. Marketing Science Institute** research grant. Project proposal titled “What is the Impact of the New Food Labels on Consumers? An Experimental Investigation.” Result: a publication in the *Journal of Marketing*.
- 11. International Council of Shopping Centers Educational Foundation** research grant. Project (Joel Herche and Siva K. Balasubramanian) titled “Ethnicity and Shopping Behavior” won a national research proposal competition. Result: a publication in the *Journal of Shopping Center Research*.

Quantitative/Methodological Issues

- * Innovation Diffusion Models
- * Modeling issues in E-Commerce
- * Wealth effects

HIGHLIGHTS

I focus on three research themes: *innovation*, *marketing communication*, and *research methods*.

Innovation/New Product Diffusion. My publication in the *Journal of Forecasting* extends the basic innovation diffusion model to generate excellent long-term forecasts for consumer durable goods by explicitly considering first-purchases and replacement purchases. Four publications in the *International Journal of Research in Marketing* investigate the role of price in new product diffusion or classify product life cycle forms with these models. Other studies analyze time-varying diffusion models that capture product quality changes, diffusion efficiency and financial innovation.

The next theme, *marketing communication*, includes marketer and consumer perspectives. The former explores how firms *effectively communicate information* to media audiences. Results suggest that a message's format is more important than its content. Specifically, I propose a new genre of marketing communications called "hybrid messages" that carry important implications for public policy (my 1994 article in *Journal of Advertising* attracted the attention of FTC and FCC). Other work [*Journal of Advertising* (2000; 2006); *Journal of Current Issues and Research in Advertising* (2000); *Journal of Consumer Behaviour* (2013); *Journal of Customer Behaviour* (2013); *Journal of Product and Brand Management* (2014); *Innovative Marketing* (2014); *International Journal of Advertising* (2016); *International Journal of Business Administration* (2016)] and ongoing work examine brand relationships, hybrid messages (e.g., product placements) and their economic worth to sponsors. Three articles in the *Journal of Marketing* examine factors that affect marketing communication expenditures. These contributions were recognized in a study of journal publications focused on advertising topics [see Ford and Merchant (2008), "A Ten-Year Retrospective of Advertising Research Productivity, 1997-2006," *Journal of Advertising*, 37(3), 69-94].

The consumer perspective asks two questions: how do consumers (a) *process marketer-provided information?* and (b) *use such information to cultivate relationships with firms?*

- With respect to (a), my publications in the *Journal of Consumer Research* (1993) and *Journal of Marketing* (2002) offer managerial insights to enhance consumers' search and use of nutrition information on food products. Articles published in 1994 and 2005 in the *Journal of the Academy of Marketing Science* focus on expertise/preference formation and event study results for firms winning high-quality achievement awards.
- Question (b) is the focus of several doctoral dissertations that I supervised.

The final theme, *research methods* considers sophisticated methods in measurement and research. A *Journal of Marketing Research* paper models and illustrates a "tailored" survey procedure that yields valid and reliable measures of a construct using only a subset of items in a standard measurement scale, reflecting significant savings in time and cost. Another study demonstrates the utility of measuring continuous, and real-time, respondent evaluations of marketing messages that extend over time e.g., exposure to a television ad that lasts 15 seconds. My publications in the *Journal of the Academy of Marketing Science* (2005) and other leading agriculture/economics journals apply research methods to assess wealth effects (e.g., the economic worth of high-quality achievement awards for firms), segmentation of donors, and consumers' willingness to pay a premium for food products. Other studies and publications address topics ranging from soy consumption, obesity and health, knowledge sharing within supply chains (*Information & Management* 2012), country of origin/country of market effects, brand romance, discounting, privacy/consumer-surveillance, e-customization, attitude toward websites, spyware and adware, online self-service, peer-to-peer sharing in the consumption of goods (*Journal of the Association for Consumer Research* 2016) and power issues within marketing channels (*Journal of Strategic Marketing* 2014).

Overall, my research work focuses on new insights about consumers. It reflects an inter-disciplinary and empirical character, and often integrates the marketing perspective with disciplines such as management, operations, communication, psychology, agriculture economics, finance or healthcare.
